

Working for a better tomorrow

BBJ Polyethylene Pipes
**CABLE DUCT SYSTEM
FOR FIBER OPTICS**

BBJ PIPE INDUSTRIES (PVT) LTD

CABLE DUCT SYSTEMS FOR FIBER OPTICS

The communication sector demands uninterrupted and reliable service for continuous transmission of data. The quality of cable duct system for fiber optics, in which these vital links are encased, must be dependable and provide the assurance of ultimate performance to preserve and protect these line for decades. BBJ Pipe offers different types of cable duct for fiber optics in various lengths and diameters in Polyethylene (PE) material.

At BBJ Pipe, best quality standards throughout the manufacturing process are an inherent value that assures the highest performance. Our manufacturing facilities start with only superior grade material resins that have been specifically formulated for long term integrity and performance cable ducting.

BBJ CABLE DUCT SYSTEM FOR FIBER OPTICS

BBJ cable duct pipes for fiber optics are manufactured strictly adhering to specifications of the customer. BBJ Pipe is striving continuously to meet the demands of the market today. Our qualification to ISO 9001:2008 certified company reflects the consistency and high technical standards observed during manufacturing of various products. It is the policy of BBJ Pipe to accomplish quality system performance by understanding and meeting its customer requirements. Some of the distinctive features of BBJ Pipe are as follows:-

- | |
|---|
| • Resulting into longer life high corrosion resistance |
| • Easy to handle and install because of flexibility |
| • Leak tight installation due to excellent fusion welding possibilities |
| • Maintenance free life and durability |
| • High impact strength |
| • Extremely light weight hence easy to handle |
| • Leak proof joints preventing ingress of ground water |
| • High abrasion resistance |
| • Shifting soils - no breakage |
| • Earthquake resistance |
| • Emergency connection possible |

PRODUCT RANGE

PE DUCTS

PE duct pipes are black in colour and are available in coils of 50 meters to 200 meters in different diameters.

PE Duct OD (mm)	Typical Wall Thickness (mm)
25	2.7
32	3.4
50	4.6
90	5.1

ACCESSORIES

PE DUCT FITTINGS

A complete range of PE compression fittings compatible with cable duct system are offered for fibre optics.

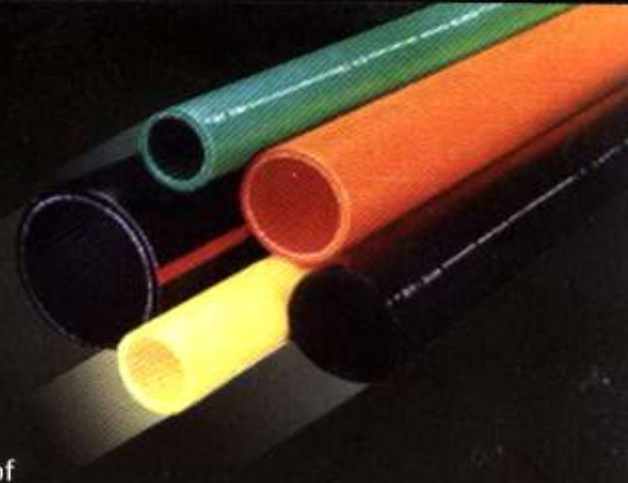

FREEDOM OF CHOICE

BBJ cable duct systems can be used for guiding and protecting cables used for various telecommunications, data and energy networks.

- Long Haul Networks
- City Rings
- Inter-city Networks

QUALITY CONTROL

To produce quality pipes of all types is our primary objective and customer's satisfaction is given priority. Our products undergo rigorous quality checks at each stage of manufacturing from raw material to finish pipe in accordance with prescribed standards & specifications.
